

Chapter 7: Future work

LegalMateAI in future Work:

Here is our plan for the coming versions of LegalMateAI:

Mobile Application:

Developing a mobile-friendly version of the platform to allow users to search for legal information, manage appointments, and track their inquiries anytime, anywhere.

Advanced Legal Document Analysis: Integrating AI-based document review to automatically detect key clauses, highlight potential risks, and summarize lengthy legal contracts.

Real-Time Video Consultation:

Adding a secure built-in video conferencing feature to facilitate direct face-to-face consultations between lawyers and clients within the platform.

Automated Case Tracking:

Implementing a tracking system that notifies users of updates regarding their legal case status, appointments, and pending document reviews.

Secure Payment Gateway:

Integrating a trusted payment system to allow clients to pay for professional legal services and consultation fees directly and securely through the platform.

Multilingual Support:

Expanding the platform's capabilities to support multiple languages, making legal information more accessible to a broader range of users.
