

GRADUATION PROJECT

LegalMateAI

Acknowledgements

First and foremost, we would like to express our deepest gratitude and appreciation to our supervisor, Dr. Mohamed Marie , for his invaluable guidance, continuous support, and expert supervision throughout our graduation project. His insights and dedication were instrumental in shaping the development of LegalMateAI.

We would also like to extend our heartfelt thanks to our families, especially our parents, for their unwavering encouragement, patience, and sacrifices. We are forever indebted to our parents, who have always kept us in their prayers and pushed us to strive for excellence.

Finally, we would like to thank our faculty at Helwan University for providing a supportive academic environment that challenged us to grow and enabled us to represent the high standards expected of our graduates.

Abstract

LegalMateAI is designed to transform the accessibility and management of legal information. It provides an intuitive, AI-powered platform where users can efficiently search for legal knowledge, generate necessary contracts, and connect with legal professionals in a secure and organized environment. The platform features a sophisticated Role-Based Access Control (RBAC) system to ensure data privacy while offering a seamless user experience for Clients, Lawyers, and Administrators. By integrating advanced information retrieval techniques and automated processing, LegalMateAI simplifies complex legal workflows and minimizes the time required to navigate legal requirements. It serves as a vital tool for streamlining professional interactions and enhancing productivity in the legal sector.
